WHY ARE WE CHANGING ?

SIMER, Public service for waste prevention and management, works for 85 municipalities in Sud Vienne. In 2018, following a phase of studies and public consultation, elected officials made the choice to evolve the waste management service.

Faced with environmental issues, the constant increase in the TGAP (General Tax on Polluting Activities) and the various laws, the goal is clear : **to reduce waste generation by 100 kg/hab (including 80 kg in black bins) and reach 65% recycling by 2025. 2021 will be a year of transition to prepare the new operational waste management service to be effective by January the 1st, 2022.**

- 40 %

of Household Waste Residual

→120 kg in 2025 in black bins

65 %

of recovered waste
53% in 2020

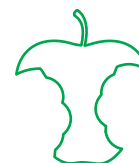

- 100 kg

waste/hab

all flows combined

→552kg/hab in 2010
→450kg/hab in 2025

SORT

food waste at the source

WHAT'S CHANGING ?

→ the generalization of **collection in individual bins (90% of users) or less frequently in PAC* (10% of users)**

*(Point d'Apports Collectifs/ Collective input point)

→ **adaptation of the frequency and the calendar of collection** corresponding the reduce of waste's production.

→ implementation of **a new individual billing rate : la Redevance Incitative**

→ reinforced support **for sort and reduction of waste** (composters, sorting facilitation...)

STEPS

2021

EQUIPMENT DISTRIBUTION
AND IMPLEMENTATION OF
COLLECTIVE INPUT POINT.

2022

IMPLEMENTATION OF A NEW
COLLECTION SCHEME AND
BLANK INVOICE.

2023

END OF OLD BILLING RATE.
FIRST REDEVANCE INCITATIVE
INVOICE.

TOMORROW'S EQUIPMENTS

WARNING : DO NOT USE BEFORE THE 1ST OF JANUARY 2022 !

The collection in **individual chipped bins** : one black for non-recoverable waste (dumped in **bags**) and one yellow for recycling waste (except glass) and papers (dumped in **bulk**). Bins are equipped with chips to record the number of times the black bin has been put into collection. So the goal is to **reduce it waste's production** and **take out the black bin only if it's full !**

 Number of people in the house	 Volume of Residual Household Waste Bin	 Volume of recyclable paper and packaging
1 to 2 persons	120 L	180 L
3 to 4 persons	180 L	240 L
More than 5 persons	240 L	360 L

or in **Collective input point, accessible with the waste pass** : a column for non-recoverable waste (dumped in **bags**) and a column for recycling waste (except glass) and papers (dumped in **bulk**).

In an exceptional way, other equipment can be proposed for technicals reasons (red bag, bins with key).

INDIVIDUALS CHIPPED BINS
(90% OF USERS)

COLLECTIVE INPUT POINT (PAC)
(10% OF USERS)

LA REDEVANCE INCITATIVE, AN INDIVIDUAL INVOICE

How is it working ?

Nowadays, production of waste is not taken into account in the calculation of the fee. Tomorrow, a home producing less waste and sorting correctly will pay less than a home whose is not sorting.
Tomorrow, the Redevance Incitative will be calculated as water or electricity, with a fixed portion and a variable portion.

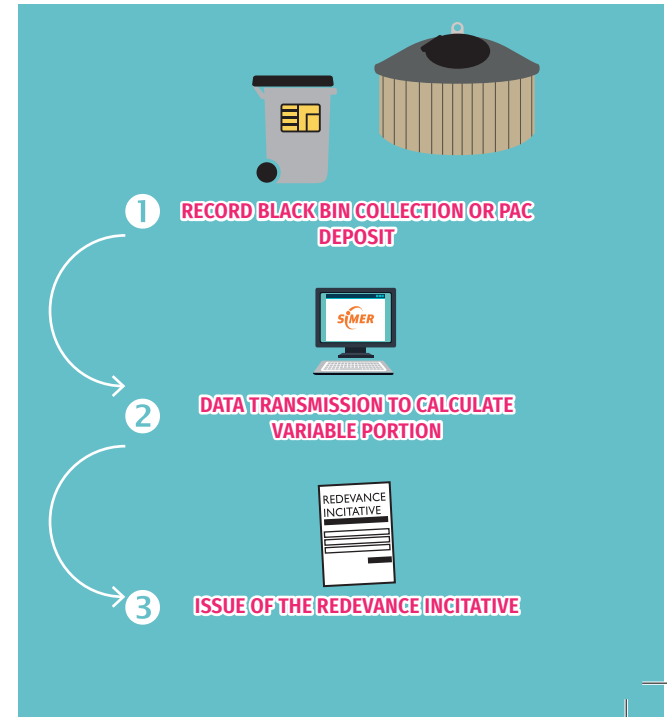

FIXED PORTION

It include the subscription at Public service for waste prevention and management : collection and treatment of household waste and recycling wastes ; collection in recycling center ; sorting center, composting platform).

VARIABLE PORTION

It is calculated based on the number of timethe black bin is collected or the number of black bag deposits in a collective input point.

HOW TO SORT AND REDUCE ?

EVERY PACKAGING AND PAPERS : INTO YELLOW BIN

empty and not nested

PLASTIC BOTTLES

EVERY OTHER
PLASTIC PACKAGING

METAL PACKAGING

CARDBOARD
PACKAGING

NOTEBOOK AND
PAPER

NEWSPAPER AND
REVUE

BOOK, LETTERS AND
ENVELOPE

EVERY GLASS PACKAGING : INTO BOTTLE BIN

without cap and lid

JARS

BOTTLES

POTS

EVERY ORGANIC WASTE : INTO COMPOSTER

tissu and paper towel include

GARDEN WASTE

FOOD WASTE

PEELING

PLANTS

COFFEE FILTERS AND
TEA BAGS

CITRUS

HOW DOES SIMER HELP YOU ?

PREVENTIVE ACTIONS

SIMER helps you sorting and reduce your waste. A special guide Redevance Incitative will be available at the end of 2021. Find others guides on www.simer86.fr

COMPOSTING HELP

SIMER organise composters individuals' sales at 15 €. You can also contact us if you want to implement a collectif composter in establishment for a group of 6 engaged home.

PURCHASING AID

SIMER now propose a new purchasing aid for washable swaps. Find all informations on www.simer86.fr
